

Press release

The Socfin Group has published its implementation plan for its responsible management policy.

Monday 17th of July 2017

As promised, the road map necessary for the policy implementation was published on its website on the 10th of July 2017.

The Socfin Group is working with [TFT](#) on its responsible management approach. Together, a first version of the [implementation plan](#) has been developed which will evolve over the time.

The initiated and planned activities are disclosed and structured around 4 axes: responsible operations development, transparency, grievance management system's optimization, sites assessment and transformation.

In the frame of its transparency approach, the Socfin Group will publish a progress update every 6months describing the actions taken to ensure compliance of its operations with its commitments.

Leading by a responsible vision of its activities, the Socfin Group is convinced that this type of collaboration is the best way to ensure long-term development of remote areas.
